**Re: Discontinuation of Solar Boost 6024HL PV module charge controller**

Effective June 1, 2010 Blue Sky Energy has discontinued manufacturing the Solar Boost 6024HL PV module charge controller, part numbers SB6024HL, SB6024HDL and SB6024HPDL. This action has been taken due to supply issues of certain key components. Warranty and non-warranty service will continue to be available for products installed in the field and those presently in distributors' stock.

A direct replacement is not presently available. Depending on the application it is possible that other Blue Sky Energy products may be suitable. Please see Technical Bulletin #100214 for current, voltage and power sizing guidelines on other Solar Boost charge controllers.
